

OSG/JLab Meeting Organization

Mark Ito
April 7, 2022

Example Issues for Discussion

- New hardware for OSG services
 - e.g., scosg16 -> scosg20, new DTN
- New software
 - e.g., OSG stack version upgrades
- New initiative from the Halls
 - e.g., Hall D using StashCache for processing reconstructed data
- Documentation enhancements
 - developments, feedback, requests

Why another meeting?

- Topics are not covered anywhere else
 - on the Halls side, topics are not of general interest to Halls' audience
 - on the Computer Center side, use-case priority hard to guess
 - at the SciComp meetings, key user participants are not involved
- Need for gathering of experts from Computer Center and JLab Users
 - information exchange
 - use case prioritization
 - solution formulation
 - two-way communication

Agenda for today (in question form)

- Do we want a regular meeting?
- What topics should be discussed?
- Who should be invited?
 - Restricted list? Anyone who is interested? OSG representative?
- What is the meeting frequency?
 - weekly too frequent, annually not frequent enough, no?
- Who will chair?
 - Computer person? Physics person? Rotate?
- What will the meeting be called?
- Other items?
- Next meeting?
