

Service Statement for MIT
19 March 2014

Personel working on GlueX from MIT.

Name	Title	Percent Time
Mike Williams	Assistant Professor	50%
Baptiste Guegan	Research Associate	100%
Justin Stevens	Research Associate	50%
John Hardin	Graduate Student	100%

General Service Statement: The group will continue to work on development of a high-level trigger and will work on commissioning this when data-taking starts. The group will continue to work on R&D for an upgraded PID system. The group will also continue its efforts in the areas of data analysis relevant to GlueX.

Work and Manpower at Jefferson Lab:

Spring/Summer 2014 John Hardin will spend significant time at JLab over the summer. He will help with installation and commissioning tasks as needed. Other group members will commute to JLab as required.

Fall 2014 The group will be mostly stationed wherever is best suited to continue the upgrade PID work. Whether this is Cambridge or Newport News, the group members will spend time at JLab to help with commissioning, calibration, etc.
