

Calibration Status

- BCAL: Calibrations under way
- CDC: Gain calibrations being done, others need to be looked at
- FCAL: Done for initial HV (<30809), rest updated soon
- FDC: Do channel timing or other calibrations need to be done?
- PS/PSC: Some initial calibration, needs to be checked.
- SC: Looks good, minor improvements possible
- TAGH: Sean is handling TDC channel offsets, run-by-run timewalk corrections need to be done
- TAGM: Sean has had success using Alex B.'s calibration scripts

- Alignment Status?
- F1TDC “unlock” checks
