

Service Statement for University of North Carolina Wilmington

Oct 26, 2015

Personnel working on GlueX

Name	Title	Percent Time
Liping Gan	Professor	30%
Timothy Black	Associate professor	15%
Jing Feng	Research Associate	10%
Student one	Undergraduate student	17%
Student two	Undergraduate student	17%

General Service Statement: The group will be responsible for the low granularity pair spectrometer detectors, to develop a PWO prototype detector for the future FCAL upgrade, and to take shifts during the experiment. Professor Gan will continue developing the JEF project with GlueX.

Work and Manpower at Jefferson Lab:

Two undergraduate students will be at Jlab for two months in the summer. They will participate testing the electronics or any other projects which need be done during that period.

Jing Feng has been at Jlab and will remain there until March 2016. He will participate in the PWO prototype detector design.

Professor Gan will be at Jlab for three months in the summer 2016. She will work on an updated JEF proposal and a PWO prototype detector. Both Professor Gan and Professor Black will take shifts during the experiment.
