Hall-D Computing Plan

David Lawrence

April 16, 2012

Contents

1 Introduction **2**

2 Reconstruction **2**
2.1 JANA Framework 2
2.2 Charged Particle Tracking 2
2.3 Calorimetry 2
2.4 Event Reconstruction 2

3 Calibration **2**
3.1 Calibration and Conditions Databases 2

4 Simulation **2**
4.1 Event Generators 2
4.2 HDDS Geometry Description 2
4.3 Full Simulation with *hdgeant* 2
4.3.1 *mcsmear* 2
4.3.2 GEANT4 2
4.4 Parameteric Simulation 2

5 Physics Analysis **2**
5.1 DST and mini-DST 2
5.2 Amplitude Analysis on GPUs 2

6 CPU, Storage, and Bandwidth Requirements **2**

7 Organization and Manpower **2**

1 Introduction

2 Reconstruction

2.1 JANA Framework

2.2 Charged Particle Tracking

2.3 Calorimetry

2.4 Event Reconstruction

3 Calibration

3.1 Calibration and Conditions Databases

4 Simulation

4.1 Event Generators

4.2 HDDS Geometry Description

4.3 Full Simulation with *hdgeant*

4.3.1 *mcsmear*

4.3.2 GEANT4

4.4 Parameteric Simulation

5 Physics Analysis

5.1 DST and mini-DST

5.2 Amplitude Analysis on GPUs

6 CPU, Storage, and Bandwidth Requirements

7 Organization and Manpower
